

Mathematikdidaktisches Kolloquium

Im Rahmen des mathematikdidaktischen Kolloquiums

spricht am Donnerstag, 27.05.2021, 16.30 Uhr

Charlie Stripp, National Centre for Excellence in the Teaching of Mathematics

über das Thema:

England's national Teaching for Mastery in Mathematics programme

Kurzfassung:

In England, the National Centre for Excellence in the Teaching of Mathematics (NCETM) has developed and is implementing a national 'Teaching for Mastery' (TfM) programme to improve mathematics teaching in both primary (ages 5 to 11) and secondary (ages 11 – 16) schools. The programme is informed by mathematics teaching pedagogy used in the far east, developed and tailored for England's primary and secondary schools.

The programme started in 2014 through exchange visits between teachers of maths from schools in England and Shanghai.

The NCETM has also developed a national network of school-led 'Maths Hubs' across England and coordinates their work. The Maths Hubs support the professional development of mathematics teachers in their regions and enable the national implementation of the TfM programme.

Both the NCETM and the Maths Hubs are funded centrally by the Department for Education.

The talk will describe the development of the TfM programme and what has been achieved so far.

Die Dozentinnen und Dozenten des Instituts für Entwicklung und Erforschung des Mathematikunterrichts laden Sie herzlich zu diesem Vortrag ein.

Bei Interesse melden Sie sich bitte bis zum 24.05.2021 per Mail bei nikole.regadas-rodrigues@tu-dortmund.de an. Sie bekommen den entsprechenden Link zur Teilnahme dann am 25.05.2021 per Mail zugesendet.
